CHAPTER 4 WORKBOOK EXERCISE

Before you can fix the guest experience, you have to see it the way your guest does — as one continuous journey, not a series of operational departments. Map it honestly before you turn the page.

1

THE CORE EXERCISE

MAP THE FULL EVENT JOURNEY

Walk every stage of your guest's journey and score the current friction level. Be honest — not aspirational. Rate each stage 1 (severe friction) to 5 (seamless). Then identify the single highest-impact fix for the two lowest-scoring stages.

STAGE 1 — DISCOVERY: HOW DOES A FIRST-TIME GUEST FIND OUT ABOUT YOUR EVENTS? SCORE: ___

Where does the awareness path break down? What's missing?

STAGE 2 — TICKET PURCHASE: WHAT DOES THE CHECKOUT EXPERIENCE FEEL LIKE? SCORE: ___

How many taps, clicks, or steps to confirm a ticket?

STAGE 3 — PARKING & TRANSIT: WHAT DOES ARRIVAL LOOK LIKE AT CAPACITY? SCORE: ___

When's the last time you actually drove in during peak arrival?

STAGE 4 — ENTRY: WHAT IS THE AVERAGE GATE WAIT AT 80%+ CAPACITY? SCORE: ___

What does the scan queue look like 20 minutes before start?

STAGE 5 — FOOD & BEVERAGE: WHAT % OF GUESTS MISS ACTION TO ORDER? SCORE: ___

Peak wait time at your busiest stand during a sellout event?

YOUR 2 LOWEST-SCORING STAGES — AND THE SINGLE HIGHEST-IMPACT FIX FOR EACH:

These are your two biggest friction leaks. Name them, then name the fix.
